Happenings Here, There and Everywhere, Past Present and Future

The time is fast approaching for you to paint and fix up, and make home look as if there was a little enterprise around you. There is no place like home, therefore make it beautiful, enchanting and your attainments for it will be the stronger.

Mr. and Mrs. B. Featherston, who have been spending the winter in town, moved on to their farm last week.

Mr. A.-E. Mannen left last week for Bridgen, Ont.

Mr. L. W. Ray returned from Calgary last Saturday.

The subject for next Sunday evening's service will be "Christianity and its relationship to politics and business, as seen from the standpoint of a layman" by Mr. Robt Smith.

Mr. R. R. Dunn was a visitor in Oyen this week.

Mr. and Mrs. J. R. Miller entertained the members of the choir last Thursday evening.

Mr. Frank Boyer made a business trip to Moccin last Friday returning Tuesday.

We have been informed by Mr. Meade, of the Chinook Produce Co., that they have secured the services of a first class baker, and from now on will be able to supply his customers with any kind of bakery.

Mr. J. W. Yake has been appointed School Inspector for the Chinook Inspectorate.

Mr. G. F. Fowler, who has been station agent here, left last week for Calgary.

Mrs. J. Key returned home last week from Rumsey.

Mr. J. H. Dowler, former agent at the depot, has again resumed this position after spending three months at Sioux Lookout, Ont.

Mr. and Mrs. May, of Alaska, are visiting their daughter, Mrs. Chas. Wyllie for a few days.

The local telephone central was moved this week to Mr. M. J. Hewitt's office.

The U. F. A. are holding a "Hard Time" dance on March 4.

Robt Smith was a visitor in Edmontion over the week-end.

Mr. J. McLeod, accountant at the Union Bank here, who has been visiting his father in Wabaha, Minn., returned Wednesday morning.

Mr. and Mrs. S. J. Taylor left this morning for Edmontion where they will reside.

Coal has dropped in price this week. Get our prices on flour, salt and barb wire. Seed and feed oats. Leave your provisional order for binder twine.—United Grain Growers.

Mr. J. D. McLean, who has been in Calgary undergoing an operation, returned last Tuesday.

Masquerade Dance Most Successful

The masquerade dance held in the Chinook School last Friday evening, under the auspices of the Chinook Agricultural Society proved to be an unqualified success. The prizes were awarded as follows:

Best dressed lady, Miss Somers representing a Japanese lady; first prize for the best dressed gentlemen went to Bert Smith who was dressed as King Charles the Second. Ladies comic prize went to Mr. L. D. Butts, while the prize for the men's comic costume was won by Mr. Gingles. The judges were Messrs. Rice and Parkinson, of Calgary, and Mr. G. Cruickshank, of Chinook. The proceeds amounted to fifty dollars.

Naco Local Want Gardiner to Run

At a recent meeting of the Naco U.F.A. Local, Robert Gardiner, of Excel, was chosen as a candidate for political honours on the Farmers' ticket for the constituency of Medicine Hat.

Do You Enjoy a Laugh?

Old friends of Red Rose Tea who have used it for many years find it the same good tea to-day as it was all during the war and for many years before.

The Only Solution

In this column a few weeks ago, some attention was devoted to the subject of the Canadian Banking system and the relations existing between the Banks on the one hand and the public on the other hand—the public being divided into two groups, those who placed money on deposit in the Banks and those who borrowed money from the Banks. At that time the principle was upheld that a Bank's first duty was to its depositors, that is, to those from whom it had accepted money and for whom it undertook to act as a trustee of the funds then entrusted to it.

It was further pointed out that the loaning power of a Bank depended upon the volume of its deposits, and that, if a Bank failed to adequately protect its depositors, it would very quickly lose them and hence have no money to loan. It may be that there are still some people laboring under the delusion that a Bank carries on a loaning business out of its paid-up capital and accumulated reserves, but it only requires a very casual study of the Monthly Banking Returns to reveal the fact that the total paid-up capital and reserves of all the chartered Banks in Canada is equivalent to only a small fraction of the amount of money they have out in loans to the people. This means that the Banks have loaned the money received by them by way of deposits, retaining in cash on hand only sufficient to meet any demands which depositors may make upon them from day to day.

Such a system—and it is the only sound and safe banking system—forces upon Banks the necessity when "hard times" and "financial stringencies" arise to curtail credits, because it is inevitable that it is during such periods that (1) the making of deposits drops to a low mark, and, (2) that those who have money on deposit have to draw some of it for use. There is only one thing for the Banks to do in order to protect their depositors and be in a position to honor all cheques drawn upon them, and that is to curtail credits and reduce loans.

In a very notable address before the Saskatchewan Grain Growers' convention at Moose Jaw in February, Hon. C. A. Dunning, Provincial Treasurer, not only very clearly outlined the above situation, but he demonstrated, apparently to the satisfaction of his big audience, why a Federal Banking system is the only one in which the people of the West can look for satisfactory results. The West is a seasonal country. In the Fall and early Winter, when the grain crop is harvested and largely marketed, the bulk of the people have money. It is at that time the farmers pay their bills, interest on loans and mortgages, and when the better established farmers place money on deposit in the Banks. At that season few farmers, comparatively speaking, require credit, unless it be for the speculative purpose of holding their grain for a rise in the market price.

At other periods of the year, farmers are not making deposits, but are either gradually withdrawing money they had on deposit or are asking credit.

In other words, at the one period of the year when a purely local or Provincial Bank would have money on deposit which could be used for loaning purposes, the demand for credit is at a minimum, while the period when loans are most urgently required is the time when deposits are not being made, but are reduced to the lowest figure. It will be seen, therefore, that a purely local Western Bank would never be able to function as a great loaning institution at the very time when loans were imperatively required. Under the Federal system, on the other hand, a surplus of money on deposit in one section of the country can be used in another section where it may be required, money flowing back and forth, or in a circle, with the varying seasonal requirements of all sections.

Mr. Dunning, therefore, held out no hope of the establishment of purely Western agricultural Banks. On the other hand, while frankly stating that the present Canadian Banking system was well designed to meet the needs of commerce—and it was for that purpose it was originally created—Mr. Dunning admitted it had its weaknesses from the Western agricultural standpoint. The remedy, however, was, in his opinion, to be found in the making of certain amendments to the Banking Act which would enable Banks to accept certain securities now prohibited to them and thereby make possible the extension of larger and better credit terms to farmers.

Many of the more far-seeing Western bankers realized the necessity of such amendments, and would favor them. Mr. Dunning, therefore, advised the farmers to urge such amendments when the Banking Act came up for its decennial revision a year or two hence, rather than to persist in the impracticable demand for the establishment of local or Provincial Banks in the Western Provinces created for the specific purpose of meeting the credit needs of agriculture. This was impossible in a country where 75 per cent. of the people were engaged in a seasonal occupation. The present Federal Banking system, revised to meet the needs of agriculture, offers the only practical solution to this problem which is so vital to the development and prosperity of the West.

He Should Worry

Holland Pays Cost of Crown Prince's Residence in Exile.

Because Holland insists that the former Crown Prince of Germany live at Wieringen, and not at any other place in Holland, the government will continue to bear the cost of his residence. This statement was made by Premier de Deerebrouck in answer to a demand made in a report by the second chamber that a Frederick William should pay for his upkeep.

"The actual internment of the former crown prince since a few years ago after his arrival in Wieringen," he said.

Find Valuable Jewels

Vast Quantities of Precious Stones in Old Trunk.

Finance Minister Hegedus has discovered vast quantities of precious stones in an old iron trunk deposited unknown years ago in the treasury building at Budapest, Hungary.

The minister was searching the treasury in the hope of finding relief for the treasury's embarrassed state and saw the trunk, which he had believed to contain papers. When it was broken into, thousands of opals and other precious stones appeared, the value of which is estimated at 200,000,000 crowns.

World Happenings Briefly Told

Cossacks are said to have attacked Trotsky's train and wounded several of his ministers.

Springfield, Ill., claims to have 6,000 women in business, professional and industrial life.

Great catacombs will be built at Cerro Gordo, Spain, where all the Catholics of Spain will be buried.

Lack of snow during the winter is causing considerable inconvenience in the lumber camps.

Catholic organs of France are deplored the fact that Gen. Castelnau was not made a marshal of France in the recent honors list.

There are indications that Enrico Caruso's voice will be better than ever after the illness which nearly caused his death.

That mentally defective persons in Ontario be barred from marriage, was one of the proposals made at the Toronto Ministerial Association.

Canada is to be represented at the first "world poultry conference," which is to be held at The Hague from September 6 to September 13 next.

Paris to New York in 12 hours will be the next development in airplane service, according to Emile Schriber, editor of the Paris "Revue des Echos."

Royal Canadian Mounted Police patrols, which have been on long-distance expeditions during the winter are returning from various districts in the Yukon.

Records of the great earthquake, which shook many parts of the earth's surface December 15 and December 16 made in Saskatoon, Sask., helped Dr. Herbert Hall Turner, professor of astronomy at Oxford University, to locate the centre of the disturbance.

Miner's Liniment For Dandruff.

Sugar Production Breaks All Records

Production of sugar in the United States in 1920 broke all previous records. A preliminary announcement by the bureau of crop estimates placed the aggregate production of beet and cane sugar for the year at 2,605,174,000 pounds, a 15 per cent. increase over the previous record output in 1916. Beet sugar at 2,219,200,000 pounds showed a 27 per cent. increase over the previous record production in 1915.

Is Your Stomach Sour? Do You Belch Gas?

If you have sour risings from the stomach, feel bloated and uncomfortable, just try twenty drops of Nerville in sweetened water. Relief will come quick. Nerville dispels the gas, sweetens the stomach, makes you fit and fine in a few minutes. As a general household remedy for many of the ills that constantly turn up, nothing is more useful in every home than a 35 cent bottle of good old "Nerville."

The best "close-up" photograph of the moon brings our nightly visitor to a point where a map may be made on the scale of 50 miles to the inch.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stony that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

May Identify Soldier Dead

Use of Teeth Charts to be Adopted by U. S. Army.

The United States graves registration service has expressed itself as opposed to the selection at present of the body of an unidentified soldier from the United States war dead in France for removal and burial with honors in the United States, should congress enact legislation to this end. The reason is the constant reduction in the number of unidentified and the hope of the eventual identification of almost all of them through teeth charts which are being sent to Washington and compared with the records.

It is an undisputed fact that some men do not have any more sense when they get married than they did when they were born.

W. N. U. 1357

Gray Flannel for This Trim Frock

By Gertrude Beresford.

Planned in all colors is a favored fabric in the realm of dress. In the model that is illustrated a very pretty shade of gray is chosen. It is fashioned on the simple lines that so accentuate the youthfulness of the figure. Dark blue crepe in two different widths decorates this delightful dress, which boasts the very short sleeves that are remarked on many of the new creations for spring. The hat of gray crepe de chine is a new version of the sailor. The crown is softly draped and the brim lightly rolled away from the face. A band of crepe de chine is drawn around the crown and tied at the sides so that the ends swing to the shoulder.

Too Much Political Graft

Neither can it be prevented, many say, or corns; but they can be relieved by Putnam's Corn Extract; it relieves corns and warts without pain in twenty-four hours. Use only Putnam's, 25c at all dealers.

Costly for Insurance Companies

Influenza Was More Expensive Than Post-War Casualties.

One of the outstanding features in the insurance business during the year ending March 31, 1920, was the excessive mortality in the early months due to the influenza epidemic, stated G. D. Finlayson, superintendent of insurance, in his report issued in the house of commons by Sir Henry Drayton. Influenza was more costly to the life insurance companies in Canada during that period than were post-war casualties.

The average man resembles a whale; he no sooner gets on top than he begins to blow.—Boston Transcript.

Miner's Liniment Relieves Neuralgia

Would Amend Banking System. Tentative steps for the establishment of a provincial rural credit system were taken recently by the Provincial Treasurer in suggesting that the Canadian Council of Agriculture commence an expert examination into the possibility of developing the Canadian banking system to meet the requirements of agriculture. The present banking system, he claimed, whilst a most admirable one, was not created to meet the demands for agriculture, and the system of management leaves it to the head office to grant loans, whose officials are not always in a position to judge the merits of the applicants.

The Family Physician.—The good doctor is always worth his fee. But it is not always wise to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and in healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

It is estimated that two years are required for the glacial water to travel from Florida to the coast of Norway.

MURINE Night and Morning. Have Clean, Healthy Eyes. Kill Eye Tires. Stop Smarting, Burning, Itching, Irritation, Inflammation or Swelling. Granulated Eye Murine for Babies, Restores, Safe for Infants or Adults. At all Drug Stores and Opticians. Write for Free Eye Book. Write to: Murine Co., Chicago.

NOURISHING AND APPETISING

Good home made bread is the most palatable, wholesome and nourishing food in the world. It is far more economical than any other staple food. If people would eat less meat and other heavy foods they would feel better and help to keep down the cost of living. Bread made in the home with Royal Yeast Cakes is more nourishing and appetizing than any other. Nothing healthier for children and grown ups.

Scientists have discovered that yeast possesses remarkable curative powers due to its richness in vitamins—that by its use the blood is purified and enriched, and the resistive power of the body to disease greatly enhanced. Soak a cake of Royal Yeast for half an hour in a cup of luke-warm water with one teaspoon sugar. Then stir well and strain once or twice through muslin and drink the liquid. BETTER results will be obtained by allowing it to soak overnight and drinking half an hour before breakfast. Repeat as often as desired. Send name and address for free booklet entitled "Royal Yeast for Better Health."

When well boiled—twenty minutes or more—it has a rich color and a particularly delightful flavor. In these respects, Postum Cereal is the equal of fine coffee; and much better for health.

"There's a Reason"

The Wide Scope of Work Carried on By the Seed Branch

The seed branch works along the lines of the encouragement of the use of better and purer seed, and the production of good seed. During the war years it also had charge of the work of insuring a proper supply of good seed for districts in Canada where there was an apparent shortage. This branch also administers the Seed Control Act, and at the last session of parliament the administration of the Commercial Feeding Stuffs Act was also placed under the charge of this branch.

There are four divisions in the seed branch, namely: Seed Testing Division, Seed Inspection Division, Seed Markets Division, Seed Purchasing Commission.

The Seed Testing Division maintains and operates Government Seed Laboratories at Ottawa, Winnipeg and Calgary, where purity analyses and germination tests of seed samples for farmers, seed merchants and institutions are carried on. Official samples taken by customs officers from seed importations, by seed inspectors under the Seed Control Act, and for special investigations are also tested at these laboratories. A great deal of investigation and research work with seeds has been carried out during the past few years, and some valuable work connected with the micro-analytical tests of feeding stuffs has also been brought to a favorable conclusion.

The Seed Inspection Division enforces the Seed Control Act. The inspectors connected with this division inspect seed grain and fibre flax seed received into, and shipped from government elevators or other warehouses by the Seed Purchasing Commission, or other dealers. Certain importation regulations are applied, and general quality standards for the various grades of clover and grass seeds have also been fixed. Samples submitted to the seed laboratories for test are graded and reported on by this division.

The Seed Markets Division compiles and issues semi-monthly seed market reports, prepares and distributes lists of reliable seed importers in other parts of the empire and foreign countries. It also supervises the administration of the subsidies paid by the Seed Branch to the various provinces in connection with seed fairs and field crop competitions. During the war years this division, in collaboration with the Division of Forage Plants of the Experimental Farms Branch, also arranged for the production of a large quantity of field root seed of which at that time it was anticipated there would be a serious shortage. Advertising and other means are resorted to in order to bring about the extension of markets for Canadian seed.

The Seed Purchasing Commission has now been in operation for some four years. It was originally established as a war measure in order to insure a supply of good seed for farmers in certain areas which had been devastated by drought or other causes, and has been in operation since that time. This commission purchases, stores, cleans and distributes and inspected seed of good quality to those districts where there is a seed shortage. It has already done a business of over three million dollars per year.

The outside work of the Seed Branch is carried on by a field staff of inspectors. For the purposes of administration the Dominion is divided into six districts, each of which has a district seed inspector in charge. The officers in these districts are occupied with seed inspection, inspecting field crops, obtaining market information, judging seed and addressing meetings.

It is anticipated that the new Commercial Feeding Stuffs Act will be put into operation early in the coming year, and this of course necessitates a large increase in the activities of the Seed Branch.

Find Arms in Berlin

An official statement concerning the recent discovery of a store of arms in the west end of Berlin, says it is estimated that the number of rifles seized will total a considerable number, 2,000 having already been counted.

A Parisian charwoman, 83 years old recently made an airplane flight, using her life's savings to finance the trip.

A Costly Lesson

Efforts to Apply State Socialism Fails In North Dakota.

The short cut to universal prosperity taken by the State of North Dakota four years ago turns out to be a blind alley. The effort to apply State socialism has failed. North Dakota is compelled by sheer financial chaos to get back into the beaten track. Disguise it how they may, the Non-Partisan Leagues have been obliged to abandon their half-completed projects and to resort to the older, well-tried methods of conducting commercial enterprises and public business.

The agitators who prey upon the credulity of agricultural communities will doubtless endeavor to represent the failure of North Dakota's experiment as due to the spiteful opposition of outside financiers and capitalists. The truth is that North Dakota has been unable to obtain the capital required to carry out its schemes because its credit was destroyed. People will not buy bonds unless they are pretty sure that the money is going to be wisely spent. Financiers will not loan capital for purposes of fanciful experimenting. So North Dakota could not sell its bonds and finds itself today with all its cash tied up and its assets either worthless or so depreciated that it can go no further without the help of the recognized financial institutions.

In order to find a market for \$6,000,000 in State bonds the legislature will be obliged to abolish most of the Socialist undertakings of the Non-Partisan League, whose leaders have necessarily consented to this course and to abandon all their projects except the State mill and devolution. Thirty-two banks have closed up and the State Bank of North Dakota is to undergo a thorough investigation.

The lesson taught the selectors of the State is an expensive one. They would have been infinitely better off had they pursued the safer, but slower, course of improving their conditions by voluntary co-operation instead of trying to utilize the powers of the State Legislature and Government to force unnatural developments.—Regina Leader.

A Monument to Animals

The Royal Humane Society Is Promoting the Movement.

Lovers of animals will be glad to learn that a monument is to be erected in honor of the services rendered in the war by dogs, horses, pigeons and other servants of man. It may be that more than one will be erected, and the Royal Humane Society is promoting the movement as far as England is concerned. Of course, the building of a monument will not do the animals any good, because they will not understand it, but the idea is that it will do us good by making everybody who sees the monument pause and reflect for a moment on the great debt the Allies owe to their dumb friends, millions of whom were killed at the post of duty. To what extent these animals knew that they were helping their masters is a problem, of course, but there can be no slightest doubt that the dogs at least, which were used for carrying messages under fire, appreciated the danger and that only their fidelity urged them to take the risks. The dogs on trench duty, too, knew their friends from their enemies and the French dogs hated a Hun as bitterly as did their masters. Horses, too, are intelligent enough to know when they are exposed to danger, and hundreds of thousands of them were well trained enough to face this danger bravely.—Mail and Empire.

Not a Matter for Legislation

Merciful Elimination of Incurables Is Condemned by Physician.

The merciful "elimination" of the incurably insane will never commend itself to the profession nor to thoughtful people, said Dr. J. G. McKay, New Westminster, attending the annual meeting of the Ontario Medical Association at Toronto.

It is not a matter for legislation. "Who is to be the executioner?" he asked. "Who shall accept the responsibility of saying that any case is 'incurable'? The essence of the matter is the same as that of releasing from agony those doomed by advanced disease to inevitable death. It is between the practitioner and his God."

The Difference.

A pessimist looks at an eye, wrinkles his face, draws up the corners of his mouth and says, "It can't be done."

An optimist has a face full of sunshine. He beams on you and says, "It can be done"—and then lets you go to it.

But a pep-timist takes off his coat, rolls up his sleeves, and goes to it, and does it.

Work of Red Cross

Demitrios Nikolao Tsakiris, 13-year-old Greek boy, who was recently restored to his father in Regina, after a lengthy search. He was a refugee from the Turks, but was ultimately located in Constantinople and brought to America through the efforts of the Red Cross Society.

Costs Money to Run a Newspaper

The Increased Subscription Prices Shown to be Fully Justified.

Out in Nebraska recently the committee on public utility information considered the status of the newspaper field with particular reference to the fact that while costs in many factories are decreasing, the subscription prices and advertising rates of newspapers are increasing.

The committee fought, after a serious investigation, that the situation is justified, and that unless the incomes of many newspapers are permitted to be increased the papers will be forced to suspend. The explanation for this situation is not difficult.

A newspaper is not so much the product of manual labor as it is the product of thought, energy and foresight. To maintain a certain standard and the paper must employ a certain staff.

Through good times or bad the standard of the newspaper must be maintained.

Its costs continue through hard times as in good times. It must produce a product which is up to standard. The cost of such a standard is fixed, beyond that it is only a question of volume, and in the question of volume, as has been explained, the rural newspaper frequently loses.

The big dailies may be able to adjust their costs to changing times, but for the country town publisher it is an impossibility.—The Fourth Estate.

Time to Stop

Some Ways of Quenching Long and Prosy Speeches.

No gavel is flourished by the speaker of the Greek Parliament. When he desires to call a member to order he rings a large bell, a bell capable of setting up a din sufficient to overwhelm with its clangor any sounds issuing from the mouth of the hardest speaker. This would seem to be a rather practical idea. The same method of obliterating noisy talkers was long employed in small New England communities of 50 years ago by communicants of a certain unorthodox religious sect. When a lay brother exceeded the limit of average patience in his talk notes would be exchanged and a deacon would pass the word to "Sing him down." Then there was the quenching remark made at a banquet in which one listener to a long and mumbly address called, "Leader!" A second voice shouted, "And denier!"

Paper Mill To Increase Output.

Plans of the Abitibi Power and Paper Company provide for not only the doubling of the present output of newsprint, but a large increase in the production of the other products of the company. The output of newsprint will be increased to 500 tons a day, and the production of sulphite and boards will be increased to between 200 and 240 tons per day. This will give the company a total production of 700 tons a day.

Reclamation Work.

Plans for drainage work on one million acres south of Winnipeg at a cost of \$1,750,000 were considered at a meeting held recently by the Red Deer Improvement and Drainage Association. Reclaimed land in the drainage districts is selling at from \$60 to \$100 per acre, the greater part of which is being purchased by Americans.

The English half-farthing has not been coined since 1856. It was made for circulation in Ceylon.

Agricultural Possibilities Of Northern Alberta Have Been Amply Proven

Boy Scouts to Meet in Winnipeg

Scouts From All Over North America Will Attend Jamboree.

About 5,000 Boy Scouts from all over North America will attend a scout's jamboree to be held in Winnipeg next summer, according to present plans. A committee of business men has been selected to conduct the finances of the meeting. Word has been received from Stamford, Connecticut, that the club packs are preparing to send a strong delegation to the gathering, while similar arrangements are being made by the organizations in Saskatchewan and Alberta. Manitoba scouts are showing keen interest in the project, as they were not permitted to send representatives to the jamboree which was held in London last summer.

Interchange of Teachers

Interchange Between Manitoba and England, Scotland, New Zealand and South Africa.

An interchange of teachers will take place this year between Manitoba and England, Scotland, New Zealand and South Africa. Altogether 20 teachers will be exchanged. These will be selected from schools of Brandon and Winnipeg, and will replace, for at least a year, 12 teachers in England and Scotland, six from New Zealand and two from South Africa. The object of the exchange is to advance the knowledge of pupils here and overseas in an empire sense, and is in accordance with a policy enunciated by the "Hands Across the Sea" branch of the Manitoba Department of Education.

Alberta Wheat Still Grading High

Excellent Quality of Last Season's Wheat is Again Demonstrated.

The continued excellent quality of last season's wheat and oats in Alberta is again demonstrated in the returns of inspections at Calgary just issued. For the month of January there were only twenty-four cars of no grade as compared with one hundred and twenty for the 1919 period. The same applies to oats, the comparison being thirty-two cars, as against 313 for the corresponding period in 1919. According to the returns there were 186 cars of No. 1 Northern, sixty-seven No. 2, forty-one No. 3. Other grades made up a total of three hundred and sixty cars of wheat. Since September 1st last until the end of last month the following cars of grain have been inspected at Calgary:

Wheat	2,005
Oats	2,048
Barley	611
Rye	181

Making Square Money

Australia Issuing Square Coins With Rounded Corners.

Australia, for the first time in her history, is issuing nickel coins. They are not disks, like our nickels, but square, with rounded corners.

They are made of this shape for two reasons. It is cheaper to cut square blanks out of metal sheets, and the coins pack better in boxes.

The idea is not so moved as might be supposed. Coins of the same shape have long been in circulation in Ceylon and the Straits Settlements.

Familiar in India is a wavy-edged nickel one-anna piece with twelve rounded corners.

Boarding School For Coast Indians.

To afford modern educational facilities to the younger Indians on the Skechewat reserve, the department of Indian affairs is preparing to erect a new Indian boarding school on the reserve at a cost of \$125,000. Announcement of this effect is made by R. H. Calma, Inspector of Indian schools for British Columbia. Tenders already have been called for the erection of the new school.

Among men and women troubled with heart disease, for every one who dies young there are many hundreds who, by living carefully and naturally, attain a life longer than the average person who has never been troubled this way.

King George receives an average of 25,000 letters a year from his subjects.

The common conception of the Peace River District in Northern Alberta is that of a semi-arid region as yet only half-explored, progressing but slowly at the cost of the toll and privation of pioneers, a country of the future possibly—but a future yet remote.

Against this stands the fact that a hundred years ago, when the wealth of this northern area was apparently realized, when the Hudson's Bay Company had established posts throughout the region and were taking from it furs of inestimable worth, the plains to the south, now the greatest contributor to the world's granary and meat market, were considered as barren vasts fit only for the buffalo and the coyote and of no value in comparison to the obvious richness of the north.

In western history the fact stands out that as far back as 1876, when the agricultural productivity of the west was yet problematical, wheat grown at Fort Chipewyan, a post established by Roderick Mackenzie, a cousin of the great explorer of the same name, secured the first prize at the Centennial Exposition at Philadelphia. This was followed up by another record in 1893, when the prize-winning wheat at the Chicago World's Fair came from the Shafesbury Settlement, fifteen miles from Peace River Crossing.

Following the settlement which has taken place in the past few years, names of Grande Prairie, Peace Coulee, Spirit River, Fort Vermilion and Lake Saskatchewan have become renowned in western lore from their productive capabilities, whilst that large region from the Whitemud River to Dunvegan Crossing as far west as Fort St. John, and Hudson's Hope in British Columbia, has proved its agricultural worth after years of successes.

As the region is attracting to it so many settlers, there being a large number of ex-Canadian soldiers among them, many false ideas of this country, which persisted in spite of proof to the contrary, are being rectified. We know now that it possesses a climate which surpasses in value that of the country to the south of it, with a longer growing season and a milder winter. Crops this year raised on the land tributary to the two railroads are estimated to amount to between 2,500,000 and 3,000,000 bushels. Little wonder then that this year, farmers have been flocking in to file on the rich agricultural lands, or that ranchers have been attracted by the luxuriant verdure of the park-like expanses and the mild prevailing winters.

The production of wheat in 1920 is estimated at 400,000 bushels as against 370,000 in 1919; barley, 250,000 bushels as against 50,000; oats, 2,000,000 bushels as against 1,500,000. There are from 25,000 to 30,000 head of cattle in the district, 7,000 horses, 6,000 sheep and 12,000 hogs. During the fiscal year ending March, 1920, there was a total of 797 homestead entries, 560 soldier grants, 38 land sales, 383 applications for patents, 232 grazing leases granted, 297 permit permits taken out, 431 hay permits secured, and 600 applicants for petroleum leases. These figures speak for themselves in regard to the popularity of this country with the modern pioneer, and bear tribute to the flow of people one year witnessed into this area.

Saskatchewan Coal.

There were 330,452 tons of coal produced from the mines operated in Saskatchewan during 1920, according to the bureau of labor and industries. There were 45 mines in operation during the year, although only 15 of them worked the entire twelve months.

Blames Unpasteurized Milk.

Thousands of men and women between the ages of 20 and 29 are dying from tuberculosis because of having partaken of unpasteurized milk, according to a statement made by Prof. Fitzgerald in a lecture to the students taking the farmers' course at the University of Toronto.

"So the young miss is to be married, eh?" said the gardener to the cook.

"Yes; and in ill-fated style, too. She's going to have three tiny yards long, and four palibearers ter kerry it."

May we remark that a man who sells parasols is engaged in a shady business?

If Thin, Nervous, Run Down, Depressed, This Will Help!

The wear and strain of life has tended in recent years to produce nervous debility in a large percentage of our population. Thousands are affected with a feeling they can't exactly describe. They are always tired and droopy, lack ambition, have poor appetite, look pale and suffer from depressing headaches and insomnia.

This condition is full of peril. It is the stepping stone to invalidism, the beginning of a shattered constitution.

We advise everyone in this condition to take a good medicine at once and try to get well while yet there is time.

Probably no better advice can be given than to use Dr. Hamilton's Pills, which have become famous in restoring the sick to good health. A general toning up of the system at once takes place. The whole body is vitalized by rich and pure blood. The appetite is increased, food is digested and naturally strength rapidly increases. Headaches go because the bowels are regulated and all wastes are carried off.

There is no experiment about using Dr. Hamilton's Pills because they certainly restore the sick, as a trial will quickly prove. Just as good for the old as the young, and suitable to the needs of women and children. This grand family medicine should be in every home.

The Lessons Of History

Nothing to Show That There Will Be Any Permanence to Our Advanced Institutions.

We recently commented on discoveries proving the existence of large-brained men at a period so remote from our own times as to be measured by hundreds of thousands of years. These, and the recovered traces of lost civilizations, have changed the simple and attractive view of human history created in the first flush of Darwinism. Modern man is not the unique achievement of the evolving human race. The lowest savages of today may not be surviving stages in the ascent of the white man from the apes, but the degenerate descendants of forgotten people with brains as large, and mental and moral faculties as high as our own. We are not the "first of all the ages," but only the representatives of one civilization, lying, as geologists would say, uncomfortably on the denuded surface of many other civilizations.

Prof. Flinders Petrie has insisted that culture is intermittent. He estimates the average duration of any period of culture at about 1,500 years. He has traced eight such periods in ancient Egypt. There have been other foci of civilization in Peru, in Central America, in China, Northern India, the Persian Plateau and Asia Minor. Evidence accumulates that these various centres have been the seat of not one but of several types of culture, each separated by an interval and each severed from its predecessor. The possibility, nay, empirical certainty, that many "practices of beautiful things" have perished swiftly and completely, is being established. The history of European civilizations has been misleading. The Minoan or Mediterranean culture, centred in Crete, was closely connected with the classical period, and modern or West European civilization, now dominant throughout the world, owes much to Greece and Rome. But even between Minoan and Rome, between Rome and London-Paris-New York, there was discontinuity sufficient to alarm an easy optimist.

If history has any lesson, it is that the confidence of those who enjoy them is no index to the permanence of institutions. Contemporary civilization differs, so far as we can judge, from all its predecessors by its world-wide geographical range and by its greater command over physical forces. But it does not follow that a more complex organization is more stable, and modern rapidity of communication transcends space and integrates the scattered peoples both for good and for evil. If our civilization can be saved, if it is worth saving, it can be only by coherent world-wide effort.—London Times.

Inspects Newspaper Plant

Prince of Wales Views Newspaper Work From the Inside.

The Prince of Wales has just been initiated into the complexities of modern newspaper production by visiting the offices of The London Times and following a piece of copy from an editor's desk, through the composing, proof-reading and stereotyping room. Then he pressed the starting button of a mammoth octuple press and saw the article reproduced in print.

The first folded paper which came from the roaring machine was handed the Royal visitor who smiled as he saw on the front page a picture of himself with a caption stating that he had started the machinery which printed it.

Throughout his inspection of the many departments of the great newspaper-office, the Prince kept up a rapid-fire of questions which showed his keen interest in the art of newspaper making.

He marvelled at the ability of "make-up" men to read type upside down and failed to recognize a three-column "cut" of himself in the form he was endeavoring to read. In the composing room he picked up a slug of type as it came from a linotype machine, but found it too hot to hold.

Jennings Memorial Fund

Plan Lasting Memorial for Late Head of Edmonton Paper.

A wide circle of friends of the late M. R. Jennings, editor and manager of the Edmonton Journal, who passed away at Victoria, B.C., have started a movement to provide a lasting memorial in the form of a stained glass window to be placed in Christ Church, Edmonton.

It is felt that such a memorial would express in part the feelings of sympathy and regard voiced in telegrams received from all parts of the Dominion and from distant places. The "Jennings Memorial Fund," with headquarters at the Bank of Montreal, Edmonton, was opened with a committee of prominent citizens in charge.

No Faith in Rain Maker

Says Nothing in Report That California Man Can Manufacture Rain.

"Nothing in it," was the opinion of Sir Frederick Spurt, Dominion meteorologist, regarding the ability of Charles M. Hatfield, of California, to manufacture rain to meet the requirements of the province of Saskatchewan, as claimed in a despatch from Regina. It is claimed that Mr. Hatfield has established a plant at Preble for the purpose of making rain for the surrounding country for a radius of 100 miles, by means of a chemical vapor.

A teacher asked a Cleveland boy in the sixth grade to write an essay on the zone. He handed this in: "The world is divided into two zones, the male and the female. The male zone is temperate, temperate or drunk. The female frigid, torrid or horrid."

Advertising His Want.

She—And how is your bachelor friend?

He—When I saw him last he was mending slowly.

She—Indeed, I didn't know he had been ill.

He—He hasn't been; he was sewing some buttons on his clothes.

A telescope which it is claimed will be the largest in the world is to be erected in Vancouver, B.C. The lens will be ten feet in diameter.

If you are as smart as you think your wife thinks you are, you're a living wonder.

Stops Bronchitis Quickly Without Any Medicine

This Problem Solved When Catarrhosis Was Discovered

Thousands Have Been Relieved.

You are nothing but a plain simple boob to suffer a day longer from Bronchitis. It's real easy to relieve—this has been proved time and again. Relief comes at once when you breathe in the soothing vapor of Catarrhosis. Once its healing, piny, essences strike the bronchial tubes, you realize that a powerful treatment is at work.

Irritation can't live in the throat of a person inhaling Catarrhosis. It is so soothing, so warming, so full of concentrated healing power that you get results at once. Catarrhosis strengthens the weak throat, stops the cough, removes that hacking irritating necessity to clear the throat, makes even the chronic sufferer realize that at last he has discovered a real relief. For coughs, colds, catarrh, and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50¢ trial size 25¢ at all dealers, or The Catarrhosis Co., Kingston, Ont.

Rural High Schools

Attempt Made to Increase the Opportunity for Education in Rural Districts.

One of the most important passages in the speech from the throne in the Alberta legislature is that relating to education and particularly the reference to rural high schools.

The departments of education in the western provinces have long felt that the providing of high school education for country pupils is one of their hardest problems. Unquestionably country-districts are placed at a disadvantage by the existing system. Parents who desire to give their children the benefits of collegiate education have to face the expense of sending them to urban centres and in many instances, this unfortunately, is not possible. Hence we have thousands of children who are themselves anxious to continue their education, whose parents would gladly have them stay at school for a few years more, forced to forego the additional help which instruction at a high school affords.

The government intimates that it intends to provide "increased opportunity for high school education in rural districts." What its plan is will soon be known but even an extraordinary expense incurred for this laudable purpose will not be criticized by the people of this province.—Calgary Herald.

The Menace of Russia

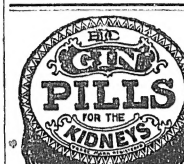

Bolshevistic Russia Constitutes a Formidable Menace to the Peace of the World.

Russia today is more imperialistic than in the days of the czars. The czars were restrained by dynastic reasons and some sense of decency, while Bolshevistic Russia is in the grip of the psychology of the Mongols, and, whether he planned so or not, Lenin is a Tartar despot.

The world would not see the German peril in time, so rivers of blood flowed. So far it has refused to perceive the Russian danger. It has been fooled by propaganda and words. It has shut its eyes to the elemental truth that vast populations do not quickly alter their characters; that Russia is Russia and will remain so; that 170,000,000 people who can be used without stint as the cannon fodder of the small imperialistic group holding mastery over them constitutes a formidable menace to peace everywhere.—From the N.Y. Tribune.

The queen bee will lay from two to three thousand eggs daily during the season. She is the mother of all the other inmates in the hive, and can lay eggs to produce either drones or workers—as the fancy takes her.

Mineral Production Up. British Columbia's mineral production for 1920 totalled \$20,860,625, which is an increase of \$2,284,312, or seven per cent, over the 1919 total. Increases were recorded in silver, copper, and zinc.

Shower of Meteors Probable in June

Any Person Who Is Afraid Should Move to Southern Hemisphere.

Dr. Crommelin has been engaged in computing the probable path of the comet Pons-Wiurach, which is expected to approach very near the earth next June. His estimate of the perihelion passage is June 15, with an uncertainty of ten days one way or the other. The perihelion distance is nearly the same as that of the earth from the sun at the end of June, and if the comet could manage to postpone its perihelion passage until June 27 or 28, the earth might stand a chance of being overtaken by it. In any case there is a considerable probability of an extensive shower of meteors being associated with the comet. At the last passage, in 1916, numerous meteors were seen probably belonging to the comet.

Dr. Crommelin has reason to think that the comet is really the same as a comet discovered in 1766. Anybody who is afraid of a collision between the earth and the comet need only migrate to the southern hemisphere to avoid all risk.

A Friend To the Aged!

When men and women get past middle life, their energy and activity, in many instances, begin to decline, and their general vitality is on the wane.

The heart action becomes weak and uncertain and the nerves more or less unsteady.

Little sicknesses and ailments seem harder to shake off than formerly, and here and there evidences of a breakdown begin to appear.

Those who wish to maintain their health and vigor and retain their energy unimpaired should use Milburn's Heart and Nerve Pills.

They make the heart beat strong and regular, brace up and invigorate the nervous system, improve the memory, and impart a sense of buoyancy to the entire system.

Mrs. James Perry, Retlaw, Ala., writes: "Some months ago I was not feeling well, my heart bothered me quite a lot, and my whole system seemed out of order. I sent and got two boxes of your pills. I took them a few days and my whole system was in a new I feel them at intervals, and am fine although 72 years of age."

Price \$3 a box at all dealers or direct from point of price by The T. Milburn Co., Limited, Toronto, Ont.

Airplane Passengers in Canada.

In Canada, during the past eleven months, 15,260 passengers were carried on airplanes for hire, flying a total of 6,811 hours and covering 429,177 miles. There were only five fatal accidents at these flights, according to a statement of Col. Robert Leckie, D.S.O., of the Canadian Air Board.

There are 300 travelling libraries in operation in Saskatchewan rural districts and the government has appropriated \$10,000 for the extension of the system.

MINARD'S "KING OF PAIN" LINIMENT

YARMOUTH, N.S.

"Oral Hygiene" Lay Education Series

"YOUR TEETH"

Race Degeneration.

By Rea Proctor McGee, M.D., D.D.S.,
Editor Oral Hygiene.

As we read history and we notice the rise and fall of nations, we realize that at certain periods of their greatness, when their governments have had the greatest vigor and their foreign commerce has been pushed to the ends of the known world, and when the armies have stood victorious in the capitals of their enemies, it would seem that no power would ever be able to rise and to overthrow them.

In many cases the fall of a nation has been caused by a powerful enemy, but more frequently has been the result of a gradual degeneration in the physical and mental qualifications of the people who constitute the country.

If you consider the glories of ancient Greece and their marvelous physical development, and their wonderful energy, their active minds and their artistic instincts, and then wonder what brought them to the low level that they have occupied for the last thousand years; you will find that it was not the invading hosts of the enemy and that it was not the violation of our present standards of morality, and it was not any of those things that are usually held up as vices. It was a new kind of disease that did the business for the old Greeks; it was simply malaria.

So great that if a nation shows signs of decay, one of the first things to do is to see if there is any extremely active disease that is attacking the inhabitants in great numbers, and if there is, there you will find the reason for a lowering of the national tone.

In America today nearly every child that goes to the public schools, and nearly every child that does not go to the public schools, is suffering from decay of the teeth. It would seem that the bacteria of tooth decay, which is just as much a disease as malaria ever was, is a widespread attack upon the people of our race. And if we are unable to check it then we must conform to the physical regulations that have been in force since the world began. Every type of animal that has disappeared from the globe has done so because the change of climate or environment had been so rapid that the development of the teeth could not keep pace with the change in food, and consequently these animals that are now extinct became so because their dental apparatus could no longer do the business. And if our dental apparatus is allowed to become a total wreck, we are doomed as a people.

Women! Use Diamond Dyes

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies.

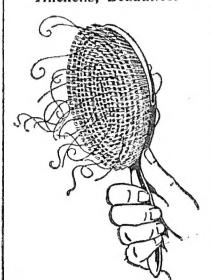

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dyeing results, faded, and ruined material by giving it a "dyeed-look." Buy "Diamond Dyes" only. Druggist has Color Card.

"Cascarets" To-Night For Constipation

Just think! A pleasant, harmless Cascarets works while you sleep and has your liver active, head clear, stomach sweet and bowels moving as regular as a clock by morning. No griping or inconvenience. 10, 25 or 50 cent boxes. Children love this candy cathartic too.

DANDERINE

Stops Hair Coming Out;
Thickens, Beautifies.

A few cents buys "Danderine." After a few applications you cannot find a fallen hair or any dandruff, besides every hair shows new life, vigor, brightness, more color and abundance.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals and on retiring. It dissolves the lime and acid accumulation in the muscles and joints so these deposits can be expelled, thus relieving pain and restoring the normal condition of the system. Seigel's Syrup, also known as "Extract of Roots," contains no opium or other strong drugs to dull or numb the pain of rheumatism or lumbago; it removes the cause. 50c a bottle of druggists.

Wool's Cotton Root Compound

A safe, reliable, penetrating medicine. Sold in three degrees of strength—No. 1, 51¢; No. 2, 40¢; No. 3, 25¢ per bottle. Sold by all druggists, or send for free pamphlet, address: THE COOK MEDICINE CO., TORONTO, Ont. (Solely Canadian).

Milch Cows For B.C.

Large numbers of milch cows will be purchased in Canada and the United States for distribution throughout the dairy districts of British Columbia, if plans which at present are being considered by the British Columbia Dairyman's Association are approved. It is estimated that there is a shortage of at least a hundred thousand cows in the province, also that there is a pressing demand for these animals among new settlers.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

One of the greatest dykes in Holland is forty miles in length, and has been holding back the water for seven centuries.

The British Museum contains 16,000 copies of the Bible.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach. It is pleasant and healthy. Children love its fruit taste. Full directions on each bottle. You must say "California."

ASPIRIN

"Bayer" is only Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin at all. In every Bayer package the name "Bayer" is printed in large letters. Aspirin is the trade mark (registered in Canada), of Bayer Manufacturing of Monacensis (Germany) of Silesia (Prussia).

CORNS

Lift Right Off
without Pain

Magiel! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Doesn't hurt a bit.

Health

Comes to you and the children if you have Dr. Pierce's Golden Medical Discovery in the house. For "little-ones" and "grown-ups" this old-fashioned vegetable tonic and blood-maker is still used by the million bottles every year. It was first used by every body 50 years ago and is still safe and sane because it contains no alcohol or narcotic. It is made up of Blood root, Oregon Grape root, Queen's root, Stone root, Cherry Bark, without alcohol. Make your blood redder and your health better by going to your nearest druggist and obtaining Dr. Pierce's Golden Medical Discovery in tablet or liquid form.

CENTRAL BUTTE, S.D.—I HAVE used Dr. Pierce's Golden Medical Discovery for a number of years, and am pleased to recommend it as a blood purifier. I know it has no equal, as I used it for my boy. My neighbors and friends are surprised with the results; in fact, I do not think he would be going to bed if it not been for the Medical Discovery. I also keep it on hand for coughs, as it differs from other cough medicines instead of upsetting the stomach, as most cough syrups do, it is good for the stomach. I only wish I had known about Dr. Pierce's medicine sooner.—Mrs. F. W. Wood.

Tell Dad

...Baby's skin—so soft, so fresh and so fragrant after the bath with "Baby's Own Soap" tells Dad to use Baby's Own Soap himself. Mother—of course—has always used it.

No skin is so tender that it will not be better for a wash with

BABY'S OWN SOAP

Household Workers Come West. One hundred and seventy-three English girls arrived in Regina last year under the auspices of the Local Council of Women, and were sent to positions as household workers in the province.

Rheumatism Relieved In 1 to 3 Days. South American Rheumatic Remedy is a wonderful medicine in the treatment of acute or inflammatory rheumatism, chronic rheumatism, lumbago, neuritis, and all ailments due to rheumatism. It often cures in 1 to 3 days. At drugists.

Habit. St. Peter looked with wonder at the two rusty coppers which the passing soul had dropped into his hand.

"Why, my good man," he asked, "what is this?"

"War tax," murmured the soul gloomily as it passed through the heavenly gates. — Omaha World-Herald.

While the father's intentions are good, the son usually tumbles into the same old pitfalls.

An eastern judge holds that perfume is not a necessity. This reminds us of the fact that a New York man lived in a house for eight months before he discovered that there was no faucet on the bathtub.

Remarkable Clock Attracts Attention

Movements Duplicate Those of Sun, Moon and Earth.

Michael Bulka, of Chicago, has invented a remarkable astronomical clock which, in a season when many new models of clocks have been exhibited, has attracted much scientific interest.

In a glass dome on top of it are a miniature sun, earth and moon whose movements duplicate those of these bodies in the heavens. The sun remains stationary but the earth turns on its axis, the moon revolves around the earth and both planets circle the sun. The globe representing the sun and moon are coated with phosphors and show the nights and days of the various phases of the earth's satellite. Eclipses of the sun and moon are clearly indicated.

The amazing thing about it is that the earth revolves every twenty-four hours and the moon takes twelve months to complete their circle about the sun while marking off the four seasons. While these planetary movements are visible, a dial on the face of the clock records the changes in days, weeks, months and years. Another dial records time, as ordinary clocks do, in minutes and hours.

For all its complicated mechanism, the clock is of ordinary size and not too cumbersome to occupy the customary place on a mantelpiece.

Applied After Shaving

Keeps the Skin Soft and Smooth

MANY men suffer from the irritation of the skin as a result of shaving. With some it assumes a form of eczema and becomes most annoying and unsightly.

By applying a little of Dr. Chase's Ointment after shaving the irritation is overcome and such ailments as Barber's Itch and Eczema are avoided.

25 cents a box, all dealers, or Edman, Bates & Co., Ltd., Toronto.

Dr. Chase's Ointment

A Story of the Sea

Is Unique Among the After-the-War Narratives.

In a great many ways Mr. Archibald Hurd's book, "A Merchant Fleet at War," is unique among the after-the-war narratives. In actual fact it is a record, at times so conservative as to be almost an official report, of the war activities of the Cunard company. But concise and exact as is its record of actual events, it contains certain passages which are epic. Consider, for example, this extract from page 103:

"It was on March 27, 1917, at eight o'clock in the evening that the Thracia, Captain R. Nicholas, while on a voyage with ore from Bilbao to Ardrosson, was sunk at sight and without warning, leaving only one survivor. Disappearing in one minute, those on board were left with no possible chance of saving their lives and it was only by a miracle that Cadet Douglas Duff, a boy of 16 years of age, was left to tell the tale. He succeeded in saving his life by clinging for sixteen hours to the keel of a capsized boat, during the early part of which time he was seen and ferreted at by the crew of the submarine. One of them, indeed, raised a rifle and aimed at him, whereupon he shouted, perhaps characteristically of the service to which he belonged: 'Shoot and be damned to you.' It seems to us that all the romantic stories of the sea that ever were told, from Casanbiana to Trafalgar Bay contain no greater thrill than this." — Halifax Herald.

More than one-third of the children in Egypt die before the age of five years.

All Night With Asthma. Every one knows how attacks of asthma often keep their victim awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering is more important than Dr. Williams' Asthma Remedy, which drives away the attacks.

"What course is Higgins in?" "Engineering in the College of Dentistry."

"How come engineering in the College of Dentistry?"

"He studies bridge-work." — Ohio Sun, Dial.

Your Home Medicine Chest. Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Williams' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Williams' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chesty coughs, burns, scalds, cuts, bruises and sprains.

Tests Saskatchewan Clay. Laboratory experiments made with Saskatchewan clay to determine its suitability for the manufacture of ceramics have revealed the fact that it is of a very high quality. A number of vases and small bowls manufactured as experiments are now on exhibition in the offices of Hon. C. A. Dunning, provincial treasurer, and T. M. Molloy, commissioner of labor and industries.

M. R. C. Ointment for sale everywhere.

Remarkable Clock Attracts Attention

Movements Duplicate Those of Sun, Moon and Earth.

Michael Bulka, of Chicago, has invented a remarkable astronomical clock which, in a season when many new models of clocks have been exhibited, has attracted much scientific interest.

In a glass dome on top of it are a miniature sun, earth and moon whose movements duplicate those of these bodies in the heavens. The sun remains stationary but the earth turns on its axis, the moon revolves around the earth and both planets circle the sun. The globe representing the sun and moon are coated with phosphors and show the nights and days of the various phases of the earth's satellite. Eclipses of the sun and moon are clearly indicated.

The amazing thing about it is that the earth revolves every twenty-four hours and the moon takes twelve months to complete their circle about the sun while marking off the four seasons. While these planetary movements are visible, a dial on the face of the clock records the changes in days, weeks, months and years. Another dial records time, as ordinary clocks do, in minutes and hours.

For all its complicated mechanism, the clock is of ordinary size and not too cumbersome to occupy the customary place on a mantelpiece.

Stoan's Liniment Pain enemy

is always ready to ease rheumatism.

At the very first twinge, do some my bottle of Stoan's; then quick relief, without rubbing, for it's stimulating and scatters congestion. The boys use it for stiff muscles, and helps Sally's backaches, too." 85c, 50c, 25c. (Made in Canada)

Will Manufacture Stooking Machines

In all probability, a plant for the manufacture of stooking machines and stook loaders will be erected at Medicine Hat in the near future by the Hills Stooking Machine Company, manufacturers of various agricultural machines.

RICH, RED BLOOD MEANS HEALTH

Pale Cheeks and Bloodless Lips Are A Danger Signal.

To be pale is no longer the fashion; to be languid is an affliction. Today the most winsome girl is the one with the pink tinge of health in her cheeks, lips naturally red, and eyes sparkling with life. Add to this a quick active step and everyone can tell the girl whose veins are full of the pure, rich blood of health. How different she appears from her ailing sisters, whose sallow limbs and weak backs make them pale and dejected. Anemia is the cause of so much suffering among girls and women that Dr. Williams' Pink Pills have transformed thousands of delicate anemic invalids into happy, healthy women. These pills help to put rich red blood into the veins, and this blood reaches every part of the body, giving strength, rosy cheeks and brightness in place of weakness, prostrating headaches and a wretched state of health. Miss Edna E. Weaver, R. R. No. 1 Chippewa, Ont., says: "I was very much run down, weak, nervous and troubled with pains in the side. I tried different medicines but without any benefit until I began the use of Dr. Williams' Pink Pills. Under their use this medicine I gained strength, had better appetite, slept better and the pain in my side disappeared. My health has since remained excellent and I advise anyone troubled with anæmia, or weakness, to give Dr. Williams' Pink Pills a fair trial."

Try Dr. Williams' Pink Pills for anæmia, rheumatism, neuralgia and nervousness. Build up your blood and note how the purer and richer blood fights your battles against disease. Take Dr. Williams' Pink Pills as a tonic if you are not in the best physical condition and cultivate a resistance that with the observance of ordinary rules of health will keep you well and strong. Get a box from the nearest drug store and begin the treatment now, or send to The Dr. Williams' Medicine Co., Brockville, Ont., and the pills will be sent you postpaid at 50 cents a box or six boxes for \$2.50.

When spectacles were first introduced it was considered fashionable to wear them even by people who were not in the least near-sighted.

Rich, Maine, and all contagious scratches on human or animal, cured in 24 hours by Waller's Sanitary Lotion. At drugists.

Grain Supplies Tobacco in the East. Much of the tobacco land in Essex County, Ont., will be planted with grain. Last season more than 20,000,000 pounds of the smoker's weed raised in Ontario was not purchased, due to an over-supply in general, and farmers do not care to undergo a repetition. The grain-growing industry will lead to a greater hog production.

Battlefields which are very prolific in Australia, are suffocated in millions by the aborigines and, separated from their wings, pressed into cakes and eaten.

Boots and Shoes and Editorial Policy

Under date of Feb. 16, the following interesting article, dealing with the Murray idea, appeared in the Regina Leader:

The Murray idea that Canadian manufacturers should only advertise in newspapers which support the Meighen Government and a high protective tariff finds a warm supporter in The Hart Boot and Shoe Co., Ltd., of Fredericton, N.B.

Unlike the Ames-Holden Co.—possibly the largest shoe manufacturer in Canada—whose shoes are apparently made to be worn by Conservatives and Liberal allies, by Grain Growers and High Tariff and Low Tariff people, and are accordingly advertised in all the newspapers irrespective of their editorial policies—the Hart Boot and Shoe Co. have laid it down as the policy of their company that they will only do business with newspapers that are supporting the Meighen Government and a Protective tariff.

The extent to which this principle is followed in the policy adopted by the Hart Boot and Shoe Co. is fully set forth in the following letter, addressed last September by the president of the company, S. D. Palmer, to the Vancouver Sun:

THE HART BOOT AND SHOE CO., LTD. Fredericton, N.B., Sept. 7, 1920.

Attention Advertising Manager.

Gentlemen: I received a day or two ago from you, your night lettergram, reading as follows:

"Your campaign has started here and we are disappointed you have overlooked us. We have been in communication with you from time to time and hoped that your advertising would appear in our columns. Sunday Sun has exclusive issue and is choice when one paper is required to cover this field."

Would say in reply, that it is true that at one time we were thinking of using your paper for the purpose of franking you for granted that you want me to be frank on reason for dropping your paper was that we do not like the editorial policy you are pursuing.

We believe that your medium has advantages, on account of it being the most important paper in the Maritimes. On the other hand we are firm believers in the policy of doing business, as far as possible, with our friends, and your attitude in some cases with respect to some questions has caused us to feel that you are more against us than with us.

The definition of your tariff policy as announced in your issue of June 29 would be fairly satisfactory, if it had been consistently followed up, but since then we notice a tendency to favor the tariff policy of Mackenzie King in preference to that of Mr. Meighen, and to my way of thinking the return of a party pledged to Mr. King's platform at the present time would inspire such a lack of confidence in business circles that the country would suffer a severe depression. In keeping with your stand upon this point you have urged the dissolution of Parliament and a general election. In our judgment that advice is contrary to the best interests of the country at the present time, because there would be the possibility of the country being governed either by Mr. King and his followers or by the Farmers' Party, or perhaps by a combination of the two, and the far-reaching dangers to established business by putting into execution the policies that they preached, would put an immediate stop to the investment of further capital and mean retrenchment all along the line.

Another matter which I might refer to is the publication of certain editorials from time to time with regard to the business interests of the country. As an illustration, I might refer to the editorial which you ran near the end of July, dealing with the Lake of the Wood Milling Company. I have no brief for this Company and have no interest in it either directly or indirectly but being a business man and a manufacturer I can see very plainly that the large profits that they were able to roll up were made by keeping their plant running to full capacity all the year around, thereby turning out a tremendous output which they could afford to dispose of at a very small margin of profit and still make large financial returns on their investment.

The average man reading an article such as I refer to above would likely be misled by the impression from your editorial that the consumer from the standpoint of price, would be much sated in the hands of small millers than in the hands of large millers, whereas as a matter of fact, if it were not for the great efficiency of the larger plants, the chances are that the consumers would be paying a good deal more than they are today for their flour.

The above illustration is given to you frankly and candidly, and it is ending by these and other articles of a like character that we have not included your paper in our list of advertising mediums.

We believe that we have the right to say with whom we shall spend our money for advertising purposes, and while in many ways we like your paper, at the same time, we cannot consistently feel that we are serving the best interests of ourselves and the business community in general, when we advertise in a paper whose editorial policy has the effect of tearing down rather than building up the business interests of the country.

Yours very truly, (Sgd.) THE HART BOOT & SHOE CO., LTD. S. D. Palmer, President.

It serves storage space. If not, get rid of it.

It is surprising how reckless many unthinking folks are about harboring pots and pans unfit for use. Once a month go over the pots and pans. If you find bits of food sticking on to the pots, remove these by boiling in water to which has been added a little laking soda or washing soda.

The washbowl will be found convenient for boiling pots and pans. Burnt-on food harbors bacteria or germs which cause decay, and a few of these mixed into the next food cooked may cause illness.

Garbage pans, sinks, toilets and cellars offer ideal places for breeding germs. A daily cleaning with boiling hot soapsuds will go a long way towards keeping them germless. A neglected pail should be filled with water to which soda has been added and boiled again and again until no garbage adheres. For a cheap, effective disinfectant, sprinkle occasionally with chloride of lime. Germs cannot live in its presence.

All dish cloths, cleaning cloths, mops and the like should not be put away full of grease and dirt. Each should be thoroughly cleansed with boiling water and soap, and soda if necessary, and dried in the fresh air before stored away.

So, make up your mind to go even through your very clean house and give it a thorough cleaning. You and your family will be happier and healthier when spring time comes round to us.

Mineral Liniment For Burns, Etc.

Decrease in U.S. Livestock. Value of livestock on farms and ranches in the United States has increased more than two and a quarter billion dollars during the last year, and the number of livestock about ten billions. Cattle and sheep decreased in number more than four per cent, and swine decreased more than seven per cent. There was a decrease in the value of more than a billion dollars in milk cows, and about the same for other cattle, while swine showed a decrease of almost a billion dollars in value of almost a quarter of a billion dollars.

Keeping the Home Clean

BY LORETTO C. LYNCH

An Accredited Expert in All Matters Pertaining to Household Management.

Just now it is rather between seasons. The holidays have passed and the spring time is not yet quite with us. Can you imagine the far-reaching influence along health lines if every housewife in the entire country gave her home a thorough and severe cleaning right now?

The right way to clean a house is simple and time saving. The wrong way of cleaning a house merely moves the dirt from one part of the house to another—such as dusting with a feather duster.

A scrubbing pal and brush, a good broom, soft cloths dampened to aid in collecting dust, warm water, soap, fresh air and sunshine are all that are required to clean up.

If a house has been badly neglected, only one room at a time should be attempted. Unless one has extra strength and facilities for caring for carpet that is tacked to the floor, it is much wiser to start with the stairway to rip up the carpet and thoroughly clean it either by beating in the fresh air or by the staining process known to the professional carpet cleaner. Then have it made into one or several rugs. These are easily picked up and cleaned daily or weekly.

Closets are often the stamping ground for innumerable germs. All closets should be kept clean and in order. Once in every two months is not too often to open up the closet and remove everything it contains. Scrub it out thoroughly with soap and warm water. Let it dry and air thoroughly. Before putting back any of the contents decide whether it is a usable article. In the case of clothing, if the garment can be repaired or remade, it de-

Don't Neglect Your Skin

Ladies—A few days' treatment with CARTER'S LITTLE LIVER PILLS will do more to clean up the skin than all the beauty preparations in creation.

Ample time is needed for the skin to be properly cleaned by a sluggish liver.

Millions of people, old and young, and men and women, take these for Biliousness, Constipation, Sick Headache, Bitter Stomach, Pimples, Eruptions, Itchy Skin, and all the ailments of the skin.

Sold by druggists for over forty years. Price 25c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

London's streets if placed end to end would form a road long enough to stretch across Europe from the North Cape to Constantinople.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

From the flowers of the Moluwa, a tree native in India, a spirit is distilled which is indistinguishable from whiskey. The dried flowers used to be imported into France, until it was discovered that "brandy" was being made from them. Their importation was forbidden.

It is sometimes easier to take things as they come than it is to induce them to come.

THIS WOMAN'S MISERY

Endowed by Lydia E. Pinkham's Vegetable Compound. Remarkable Recovery of Mrs. Church.

Smiths Falls, Ont.—"I suffered with falling of my organs, pain around my heart and in bowels and down my legs, neuralgia in my face and head, and that terrible sinking feeling. I felt that I could not live and would fix my house in order every night so there would be no trouble if I dropped off in the night. My husband went to the drugstore to get the best remedy he had and he gave him Lydia E. Pinkham's Vegetable Compound. I took six bottles and felt a lot better. I will always recommend the Vegetable Compound, and you can use these facts as a testimonial." — Mrs. J. O. Church, Box 845, Smiths Falls, Ont.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pain, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about your case write to Lydia E. Pinkham, Medicine Co., Lynn, Mass.

won the Grand Aggregate, while
Rennie's rink won the first prize
in the Curling Club event.

Church Going

Church going is a means of
Grace, and divinely appointed.
It is helpful and restful. A fine
investment of your time. It de-
velops the best powers of the
man. But how easily neglected.
Absence one Sunday makes it
easy to stay away the next Sun-
day. The slightest irregularity
in attendance will work serious
havoc with a good habit. Then
we reach for an excuse. We
shall find plenty except good
ones. Most excuses analysed
means simply "I don't wish to."
If you will attend church regular-
ly one quarter, you will want to
go. Try the remedy. Begin
next Sunday if you have not al-
ready begun. We shall look for
you.

WORLD SHORTAGE OF MEATS

It is estimated that the world
requires fifty billion pounds of
meat annually and that while the
population increased by 85,000,000
(that is from 510,000,000 to 595,-
000,000) between the years 1901
to 1914, cattle, sheep, and hogs
combined only increased 40,000,-
000 (that is from 1,065,000,000 to
1,105,000,000). This of course in-
dicates that there is not only a
shortage of meats in the world
now, but that as the years go by
it must become greater and
greater. Dealing with this sub-
ject in an illuminative article in
the December number of the Agri-
cultural Gazette of Canada, Mr.
P. E. Light, Chief of the Markets
Intelligence Division, Ottawa,
points out that general economic
progress as well as the increase
of human population and the
status of living in the consuming
world, makes fresh demands upon
available lands and tends to bring
about a relative decline in the
output of animal produce. This
decline must be offset by an ex-
tension in live stock production
sufficient to meet the increased
consumptive demand. Any great
augmentation of population in
Canada at the present time would
find us in a situation where we
would be severely taxed to pro-
vide for the total domestic de-
mand, or else compelled to cur-
tail our export trade.

Change in Train Service

Commencing last Sunday, Feb.
27, the following change in the
train service took effect.

No. 9, from Saskatoon, going
to Calgary will arrive at Chinook
at 4:51 a.m. daily except Monday.
No. 10, from Calgary going to
Saskatoon, will arrive at Chinook
at 2:40 a.m. daily except Sunday.

J. Key Elected Councillor

At the municipal election for a
councillor for Division 6 of the
Cullholme Municipality which
was held last Monday, Mr. J.
Key was elected. Mr. Kinch, re-
tiring member of the council was
the other candidate running for
the office. There were 36 votes
polled, 25 in favor of Mr. Key
and 11 for Mr. Kinch.

Tuxis Conclave

A Tuxis conclave and tourna-
ment was held on Friday last at
Oyen. There were representa-
tives from Youngstown, Chinook,
Cereal, Excel, Oyen and Sibbald.
Owing to unfavorable weather for
skating, a shooting contest was
substituted for the hockey match
which had been previously an-
nounced. Supper was then served
in the church at which about
35 Tuxis boys and 10 Mentors
did ample justice. After supper
the following program was given:
Songs and Yells of Tuxis Squares.
Address of welcome by the
Pretor of the Oyen Tuxis Square,
who also acted as chairman.

Replies by representatives of
each visiting town.
An address by Mr. Whitlock
on the Tuxis work in Oyen.

A report of the Older Boys
Parliament held in Edmonton.
An address by Wallace Forgie
on Tuxis Ideals, who also dem-
onstrated the lighting of a Four-
Fold Fire by rubbing sticks.

This was followed by a Tuxis
Tournament in which all the boys
from each town took part.

The Chinook boys made a
very creditable showing, gaining
third place in the tournament.

A very enjoyable and profitable
evening was brought to a close
by the singing of "Blessed be the
tie that binds" and repeating to-
gether the Omaha Indian Tribal
Prayer.

As the spring assumes its
wonted genial atmosphere there
is a general stir and bustle among
our mechanics and the saw and
hammer so long silent are
brought forth and their clatter
and bang reverberates on every
hand.
